PREQUALIFICATION DOCUMENT

1.0 INTRODUCTION

1.1 ADVANTAGES OF PREQUALIFICATION

Pre-qualification is an assessment made by the Employer, of the appropriate level of experience and capacity of firms expressing interest in undertaking a particular contract, before inviting them to bid.

Pre-qualification of constructors is very useful for the Employer (also to the constructors) to carry out selection of firms for award of contracts. The basic aim of the pre-qualification is intended to eliminate, early in procurement proceedings, Constructors that are not suitably qualified to perform the Contract. Also sometimes Constructors are reluctant to participate in procurement proceedings for high value Contracts, if the competitive field is too large and where they run the risk of having to compete with unrealistic tenders submitted by unqualified or disreputable Constructors. Furthermore, the Prequalification is the basic tool to:

- (i) Encourage realistic bids by the Bidders because they know that they are competing against qualified bidders who have cleared the minimum competence criteria;
- (ii) Assess the interest of the prospective bidders in the bidding process;
- (iii) Make any adjustments/modifications in the bidding documents if a pointer is available from the lack of interest by the prospective bidders applying for pre-qualification;
- (iv) Reduce the effort and so the time in evaluation of bids from un-qualified bidders;
- (v) Help the bidders to evaluate and take stock of their capability and consequently to form joint ventures with other firms;
- (vi) Reduce the problems associated with low priced bids from bidders of doubtful capability and;
- (vii) Help the bidders who are insufficiently qualified to avoid the expense of bidding.

1.2 Recapitulation

To recapitulate the afore-given, the pre-qualification specifically means selection of competent bidders prior to issuance of the invitations to bid. It is required for large or complex works, in certain cases for custom designed equipment and specialized services. Pre-qualification is also helpful for providing a chance for selection of smaller constructors under "Slice and Package" system of tendering. Pre-qualification is also useful in saving the employers from numerous un-necessary problems.
